

Label RF NT4040/SP/Frozen

#5284511 | RF 8.2 MHz

Nedap RF labels belong to the best performing labels world-wide. They are the only RF EAS labels that are tested 100% meaning not only each label will work, it will as well have a minimum performance. This provides a very stable detection and deactivation performance. Nedap RF labels are compatible with all RF 8.2 MHz systems.

Label RF NT4040/SP/Frozen

This food label is especially designed for application on deep frozen products. This is indicated by the snowflake symbol. The NT4040/SP/Frozen can be applied to products at a temperature between -18 °C and 30 °C / -0.4 °F and 86 °F. The "waterproof" plastic top layer in the RF label is suitable for products that have a long shelf life. Approved for indirect food contact. In addition, the label includes 2 written warnings:

- "Security Protected"
- "Remove all packaging before defrosting and cooking"

Benefits

- Approved for indirect food contact
- Especially for deep frozen food products
- Color: grey

Technical Specifications
